INTENSITY-LOW

INvestigating the lowest Threshold of vascular bENefits from LDL cholesterol lowering with a PCSK9 mAb Inhibitor (alirocumab) in healthy volunteers - A mechanistic physiological study (INTENSITY-LOW)

Would you like to help with Medical Research?

Are you a healthy male or female aged between 18-45 years?

If so you may be eligible!

This study is investigating the effects of lowering LDL Cholesterol (‘Bad Cholesterol’) and determining what benefits this has on improving vascular function

If you think you may be interested and would like additional information about the study, please contact our research team:
